

Live Streaming

Inclusive Digital offers a reliable and professional live streaming and webcast service for businesses, professional organisations, and charities.

We can stream any kind of event – including conferences, seminars, speeches, product launches, or promotional events.

Our service includes planning, carrying out an onsite recce, filming the event, and then streaming it from the location via the cloud to online viewers.

The streaming can be accessed on desktop computers, laptops, tablets and mobiles.

Inclusive Digital is a London-based digital production company that has been in business since 2007. We specialise in website development, video production, event filming, eLearning platforms, and live streaming.

We're highly experienced – and have a reputation for being reliable and professional.

British Society for Rheumatology
AUTUMN CONFERENCE 2015
 Case-based discussions
 15-16 October 2015 | The ICC, Birmingham

Autumn Conference Live Streaming

Welcome to the British Society for Rheumatology's Autumn Conference Live Streaming website. We would like to offer our international audience the opportunity to stream the Thursday 15th October afternoon session of the conference.

Tweet your questions to our panel using the hashtag [#BSRAutCon](#).

Check the [technical information](#) before you join and find out more about [Autumn Conference](#).

MCQs – True or False?

1. Immunosuppression for autoimmune rheumatic disorders is the most common predisposing factor for PML.
2. PML results from primary infection with the JC virus.
3. In patients with autoimmune rheumatic diseases and PML, SLE is the most common underlying disorder.
4. The gold standard for diagnosis of PML is a positive JC virus PCR in CSF.

Our live streaming packages include:

Planning: this includes client liaison, specifying technical requirements, and carrying out a broadband site check.

Dependability: we use reliable, high-end equipment to stream your event.

Online: the event can be streamed to social networks, embedded on your own website, or played out on a dedicated microsite, that we can design and develop for you.

Recordings: we record the stream so the videos can be uploaded after the event for on demand viewing on your own website, YouTube or Vimeo.

On the technical side, we use Blackmagic mixers, Wirecast software, the Wowza Cloud, Sony PXW HD cameras, Sennheiser microphones, and Dedolight/LED lighting.

We work with a growing number of companies and organisations, including professional membership organisations, charities, agencies, and UK and international firms.
