

Inclusive Digital

Website Development

Inclusive Digital specialises in the design, development and management of high quality, interactive websites.

Our websites work across all platforms, and have a responsive layout for mobiles and tablets. We work with a leading UK hosting company, a global Content Distribution Network, and secure payment systems. And we construct the sites either on our own dedicated Zend-based framework, or on WordPress.

We can also design, develop and operate mobile Apps – in both iOS and Android formats.

Inclusive Digital is a London-based digital production company that has been in business since 2007. We specialise in website development, video production, event filming, eLearning platforms, and live streaming.

We're highly experienced – and have a reputation for being reliable and professional

The screenshot shows the homepage of the National Jazz Archive website. At the top left is the National Jazz Archive logo. The main heading is 'Presents The Story of British Jazz' with a 'Register for updates!' button. A navigation bar includes links for HOME, NEWS, RESEARCH, LEARNING, JAZZ HISTORIES, EVENTS, BLOGS, ABOUT, LOCATION, SUPPORT US, and CONTACT. The main content area features a 'Welcome to The Story of British Jazz' section with a sub-heading 'News, resources and stories from the National Jazz Archive'. To the right, there are sections for 'SUPPORT THE NATIONAL JAZZ ARCHIVE', 'INTRODUCTION TO THE ARCHIVE', and 'LATEST NEWS'. The 'LATEST NEWS' section includes announcements about a fundraising concert and the opening of digital collections. A 'Tweets' section shows recent tweets from @JazzArchive. At the bottom, there is a 'Contact or Visit Us' section with address and contact information, and a 'Supporters' section listing Essex County Council, The National Lottery, and the Heritage Lottery Fund.

Website Features and Functionality

- A user-friendly interface
- Responsive design for mobiles and tablets
- Full client branding
- Content can include text, images, video, audio, and interactive elements
- Hosting on dedicated servers, and streaming via a global distribution network
- Compatibility with all major browsers and operating systems
- Configuration for SEO and integration with Google Analytics.

Examples of websites that we have recently designed and built:

- The Creative Dimension Trust (<https://thecreativedimension.org>)
- East West: The Art of Dialogue (www.eastwestdialogue.org)
- National Jazz Archive (<https://www.nationaljazzarchive.co.uk>)
