PRACTICES BY OCCUPATION

- Practice challenges

The digital production company Inclusive Digital has developed a highly flexible online video platform – which can be used to replay presentations and lectures from events and conferences.

The **Inclusive Video and Slides Platform** has two screens – one for the video of the speaker or lecturer, and one for their Power Point slides.

The platform is ideal for conferences, seminars, product launches, and promotional events.

Clients include the College of Occupational Therapists and the Society for Experimental Biology.

## Platform Features

- **Dual Screen:** shows the video of the presentation in one panel, and the slides in an adjoining panel.
- **Global Server:** videos play 'on demand' from a global video server system, with a range of streaming options, from HD to low bandwidth.
- **Responsive Layout:** works on mobiles, tablets, laptops and desktop computers.
- **Flexible Access:** the site can be open or have login and registration.
- **Payments:** integration with 3<sup>rd</sup> party payment systems.
- **Client Branding:** the client's logo and colours are incorporated in to the design.
- **Search:** the site can include a range of search and category filters.
- **Search Engine Optimisation (SEO):** to give the site visibility on Google.
- **Google Analytics:** to give up-to-date information and analysis of site usage.
